Japanese Sake Spec Sheet

Brewery	KIKUNOSATO SHUZO CO., LTD
Founded	1866
Profile	The brewery desires to create sake that embodies their respect for the abundant goods offered by the vast Nasu land in Tochigi prefecture and shows our appreciation for the rice, water, soil, people, skills, and locale. Thus the brand name 大那 Daina: the first character 大 or "dai" means great or vast; the second character 那, read as "na", comes from the name of the region "Nasu". In keeping with the Daina brand, our goal is to make 100% local sake packed with the bounties of this vast Nasu land. A team of 4 full-time employees producing 117 kiloliters (31K gallons) of sake annually. 80% of production is dedicated to Junmai. 70% of sales are outside of the prefecture, and 30% are local.

Tasting Notes

An official collaboration with the hit manga and anime series, Attack on Titan. Launched under the theme of "BEYOND THE WALL" expeditions, by superimposing the "Survey Corps" combating against the Titans in the anime and the real-life struggles of humanity against coronavirus, with both fighting against unknown enemies.

A genshu (undiluted) type of sake. Even with low alcohol content, this sake has a full and robust flavor. It has an aftertaste that lingers with a variety of unique flavors just like the unique personalities of the Pure Titans in the anime. Aromas of caramel apple, melon, and mochi bring to mind the "child-like" Pure Titans.
