Japanese Sake Spec Sheet

Brewery	MATT BREWING COMPANY (CAN CHU-HI JPOP IS THE PRODUCT FOR TAKARA SAKE USA INC.)
Founded	
Profile	JPOP is a refreshing malt beverage blended with natural flavors. "TAKARA CAN CHU-HI" was first introduced in 1984 in Japan, and instantly became the most popular chu-hai beverage in Japan. Chu-hi is an abbereviation of "shochu high-ball" and is traditionally made with shochu and carbonated water blended with a mixture of natural flavors (shochu is a Japanese traditional distilled drink made from a variety of grains, like vodka). JPOP is a delicious and refreshing beverage created with malt instead of shochu, and carries on the clean crisp texture of the original "TAKARA CAN CHU-HI."
